2013 Waco Water Quality Report Now Available

The City of Waco has released its 2013 Water Quality Report. Water bills during the months of June and July announce the availability and location of the report online at: www.wacowater.com/waterqualityreport (direct URL: www.wacowater.com/2012WQR.pdf).

Customers preferring to have a printed copy of the Water Quality Report mailed to their residence may request one by calling 299-CITY (2489). The report is also available at City Hall, the Waco Water Office and all branches of the city's public library.

The Water Quality Report, also known as a Consumer Confidence Report, is released annually and made available to all customers receiving water service from the city. The report lists any contaminants found in the drinking water, as well as disinfectant levels throughout the previous year.

In addition to water quality data, the Water Quality Report contains information about water conservation, stormwater pollution prevention and other information relevant to the water system.

Water Quality Reports, or Consumer Confidence Reports, are mandated by 1996 amendments to the *Safe Water Act*. All public water suppliers that serve the same people year round (community water systems) are required to provide consumer confidence reports (CCR) to their customers annually.
