Section 1 – Introduction

1.1 – MPO Background

The Waco Metropolitan Planning Organization (MPO) was created in 1974 in order to comply with federal requirements that all areas over 50,000 population must incorporate local input into decisions involving federal highway or transit funds. Today the role of the MPO has expanded to identify all mobility needs for the Waco Region and determine regional transportation policy. Inherent within this role is the need to involve the citizens of McLennan County into the transportation planning process and incorporate their concerns into the various plans, programs and policies adopted by the MPO.

Governing the MPO is a 20-member policy board consisting of elected officials and other representatives from the 19 member cities, McLennan County and the Texas Department of Transportation (TxDOT) (See Appendix A for a map of the Waco Metropolitan Area). Assisting the Policy Board is the MPO staff, producing drafts of necessary plans and programs and providing policy recommendations to the board. The staff also administers the public involvement procedures for the MPO and ensures that public concerns are voiced to the MPO Policy Board.

1.2 – Purpose of Public Participation Plan

The Moving Ahead for Progress in the 21st Century (MAP-21) requires MPOs to develop a Public Participation Plan (PPP) to specify the MPO's efforts to involve the public in the development of the Metropolitan Transportation Plan. Since public involvement is critical within the entire transportation planning process, the MPO has adopted this plan. Its primary purpose is to ensure that all policy actions of the MPO Policy Board are made only after the public and key transportation stakeholders have been informed about the issue and been given a reasonable opportunity to comment.

The MPO creates and amends many documents on a regular basis for adoption and approval by the Policy Board. The following narrative briefly describes these documents and Table 1.1 defines the associated policy actions.

Metropolitan Transportation Plan (MTP): A document, formerly known as the Long-Range Transportation Plan, which identifies existing and future transportation deficiencies and needs, as well as network improvements needed to meet mobility requirements over at least a twenty five year time period. To receive federal funding, a transportation project must be included in the MTP and the TIP.

Transportation Improvement Plan (TIP): A four year transportation investment strategy, required at the metropolitan level which addresses the goals of the long-range plans and lists priority projects and activities for the region.

Texas Urban Mobility Plan (TUMP): A needs-based plan which quantifies transportation needs beyond the fiscal restraint barrier. It provides for balanced transportation and land-use decisions that accommodate growth, while minimizing any negative transportation, air quality and community impacts.

Unified Planning Work Program (UPWP): Biennial report or budget document prepared by the Waco MPO describing transportation planning activities which will be performed by the MPO staff.

Thoroughfare Plan: A plan which outlines the functional classification of existing streets and roadways within the Metropolitan Area based on levels of mobility and access as well as proposes long-range facility improvements.

Bicycle & Pedestrian Plan: A plan which focuses on the improvement and maintenance of bicycle and pedestrian facilities as alternative modes of transportation.

Annual Listing of Federal Projects (APL): A listing of projects for which federal funding was obligated in the previous fiscal year. The APL also provides a record of project delivery and is intended to increase awareness of government spending on transportation projects.

Annual Performance and Expenditure Report (APER): Annual Performance Expenditure Report (APER) is an annual work performance review of all proposed transportation planning and related activities of the Waco MPO as submitted in the Unified Planning Work Program.

* *Abbreviated Process* applies only to the specific minor actions of the Policy Board identified above. The approval process is shortened due to the constricted time between the release of the information required to be in the documents and the approval deadline as required by Federal Law. (See Section 2.3, Activity 3)

** *Administrative Corrections* applies to an amendment for the sole purpose of correcting a scrivener, clerical, or mathematical error or omission within a document previously approved by the Policy Board. This type of correction does not require Policy Board action.

Consistency with Public Transportation Planning Activities

Many of the planning activities of Waco Transit overlap with the activities of the MPO. Similarly all significant public transportation projects or services are incorporated within the documents produced by the MPO. As a result, this public participation plan will be used to meet Federal Transit Administration public participation requirements for the City of Waco and Waco Transit.

1.3 - Public Involvement Goals

In addition to the listing types of policy actions, this plan also defines the tasks the MPO staff will undertake to incorporate public comment into the various activities undertaken by the MPO.

To accomplish this mission, the Waco MPO has adopted the following goals to incorporate public opinion into the transportation planning process.

Goal 1: Educate and Inform the Public

The Waco MPO staff shall educate and present information about the transportation planning process, including the sources of funding and impacts of regional planning decisions. The MPO staff shall also explain the specific tasks and goals of the Waco MPO, as well as related tasks that are not in the MPO's authority to perform. The MPO staff shall also disseminate information regarding upcoming decisions involving federal highway or transit funds within McLennan County.

Goal 2: Solicit Input from the General Public

The Waco MPO shall gather representative input from the public to identify mobility needs, desires, issues and concerns. The Waco MPO shall continuously seek comment from the public throughout the transportation planning process, at key decision points and when final product drafts are issued. The MPO staff will also closely monitor public input received through major project development and corridor studies.

A vital aspect of this goal is the provision of opportunities for involvement to a wide range of members of the public; (i.e., citizens with different interests). The Waco MPO will coordinate with individuals, institutions or organizations to use community-based public involvement strategies that will reach out to members of the disabled, minority, special needs and low-income communities.

Goal 3: Facilitate Information Flow between the Public and Policy-Makers

The Waco MPO staff is responsible for compiling public issues, comments and concerns into complete and concise documents for presentation to the MPO Policy Board. The MPO staff shall also schedule and organize meetings where the public can present concerns to the staff or the Policy Board.

Goal 4: Consider Public Concerns in Decision Making

The MPO Policy Board shall consider, and when appropriate respond to, the public concerns that are presented to them by the MPO staff as well as those presented to them by individual persons at public meetings. The Waco MPO staff shall also consider public concerns as it prepares draft planning documents.

Goal 5: Provide Visual Representations of Proposed Actions

In addition to verbal descriptions, all proposed actions by the MPO Policy Board that impact specific transportation projects will, when appropriate, provide cartographic, photographic and / or artistic representations to show approximate location, design considerations, possible environmental impacts and potential aesthetic considerations.

Goal 6: Meet Legal Requirements

The Waco MPO will meet all legal requirements for noticing meetings and providing opportunities for the public to comment on proposed actions of the MPO.

Section 2 – Outreach Activities

In order to achieve the *Public Involvement Goals* outlined in Section 1, the MPO has identified seven activities that are intended to solicit input into transportation policy decisions. Each activity is identified in the approximate order upon which they will be put into action.

Each Outreach Activity specifies the type of task that will accomplish the goal of public outreach and inclusion in the transportation planning process. Notification prior to any MPO Policy Board action is required and the timeline for notification is outlined with each activity. In addition, each activity is rated by its ability to accomplish the six Public Involvement Goals. The rating key is as follows:

- Significantly Accomplishes Goal
- ◐ Moderately Accomplishes Goal
- Accomplishes Goal “A Little”
