PUBLIC INFORMATION RELEASE

Dateline: 6-19-15

Release Number: 1000-2

Subject: Twin Peaks Update #2

Contact: Sgt. W. Patrick Swanton

The investigation of the Twin Peaks shooting is continuing in conjunction with the FBI, ATF, Texas DPS, Texas Rangers, and the TABC. We are making progress in the case. We want to remind our citizens it will be a lengthy process. Some of this is due to the complexity and scope of the case and also the need to rely on other entities to complete certain forensic and lab test.

As with most criminal cases, suspects, witnesses and victims cooperation can be instrumental in the pace of the investigation. With the Twin Peaks Incident, detectives are having an even more difficult time getting cooperation from those involved. Every measure will be taken to ensure a thorough and comprehensive case can be transferred to the District Attorney.

Our vehicle forfeiture part of the investigation has neared completion. Those affidavits have been given to the McLennan County District Attorney and have been processed by them through the courts. Each affidavit contains different yet specific information on the Twin Peaks Shooting case and may be obtained through the McLennan Co. District Clerks office.

To date we have seized 17 motorcycles, 8 trucks and 2 SUV's for forfeiture. We have released 91 motorcycles and 62 autos to their registered owners and 20 motorcycles and 9 autos to their lien holders after repossession orders were received.

There are a variety of reasons as to why vehicles may not have been seized and they include:

Many of the vehicles had an extremely high lien amount in relation to the value of the vehicle.

A number of the vehicles are from outside of the Waco area. They were registered to someone other than the person who drove it to Waco.

Other unique situations that were identified during the investigation, such as registered owners who were deceased (unrelated to the Twin Peaks incident), vehicles that were improperly registered salvage vehicles, etc.
