RFQ 2023-012, Design Build Services for Bridge Lighting  
Upgrade at IH 35 Brazos River, Waco, Texas

**Answers to Questions:**

1.) Can lights be attached to the bridge cables?

A: The actual design is not part of the RFQ

2.) Can information on existing LED lights and controls at this site which was installed back in 2015. So that we can judge correct amount of lights and wattage on our proposal.

A: The actual design is not part of the RFQ

3.) Is it possible to set up an appointment to take a look at the current controls system. We would like to better understand what they have now to see if any existing infrastructure can be repurposed in order to be more accurate on the bid. Would also be helpful to understand why/ what failed in the first design.

A: This first step is a Request for Qualifications and does not include a bid or any design work.
