

CADD Standards and Procedures Manual

SECTION 13 - PLOTTING

CTB Files

The City has a base CTB file – “COW Basic Plot Style” which can be downloaded from <https://www.waco-texas.com/Departments/Public-Works/Engineering/CADD-Standards>. Because there are so many different kinds of drawing submittals to the City, this CTB File may need to be modified to delineate and emphasize what is needed in the drawing file. This file is flexible to be modified by the consultant. The consultant will use their best judgment in look and feel when setting up the drawing for plotting. The City will provide feedback during review if the represented line-work needs to be adjusted. **The modified CTB file used for plotting/publishing shall be included in the files submitted to the City at the completion of the project.**
