

# Quantitative N95 MASK FIT TESTING

The Waco-McLennan County Public Health District now offers quantitative N95 fit testing services! Fit testing is by appointment only. Our clinic uses 3M brand N95 masks. If you require or prefer another type, you must bring your desired mask in multiple sizes to your appointment. The testing process will destroy the mask used for testing.

- A successful fit test only qualifies a person to use the specific brand/make/model and respirator size worn during that test. Respirator sizing is not standardized across models or brands. For example, a medium in one model may not offer the same fit as a different manufacturer's medium model.

**Fee: \$20, includes medical clearance and fit testing. We are unable to refund for the inability to complete testing.**

- ✓ Download and complete the medical questionnaire.
