Atmos Energy to Flare Natural Gas in Robinson

WACO, Texas (March 22, 2018) – Atmos Energy crews and contractors will oversee a controlled natural gas flaring on Thursday, March 22, from approximately 8 a.m. to 10 a.m., in the City of Robinson. The flaring site is southeast of Greig Drive in Robinson, and approximately one mile east of IH-35.

“Flaring” is a standard industry practice to safely burn natural gas that must be removed from a specific section of pipeline so that employees can work on the pipe. Residents and motorists in the area may notice a large, controlled flame and moderate noise for approximately two hours.

Emergency and municipal officials have been advised of the planned flaring operation.
