FRUIT LOOPY OCTOPUS

YOU'LL NEED:

- Single sheet of cardstock
- 8 pipe cleaners
- Fruit Loops cereal
- Crayons
- Glue
- Hole punch
- White construction paper or large googly eyes

=

INSTRUCTIONS:

1. Cut out the shape of an octopus head from a sheet of cardstock (refer to photo above for shape). If the cardstock is white, use crayons to make it the color of your choice.
2. Punch 8 holes along the bottom of the octopus.
3. Insert a pipe cleaner into each hole to form the legs. To secure, twist a small section of each pipe cleaner around itself (at the top near the hole).
4. Thread fruit loops onto each pipe cleaner.
5. Bend or twist the bottom of each pipe cleaner to keep the fruit loops from slipping off.
6. Glue on googly eyes, or use white construction to cut out eyes.
7. Your octopus is now ready to display!
