MAKE A PAPER TULIP GARDEN

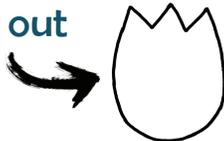

YOU'LL NEED:

- Green straws
- Construction paper
- Scissors
- Hole punch (if you have one)

INSTRUCTIONS:

1. Draw a tulip shape onto a piece of construction paper (using any color you like), and cut it out

2. Trace leaves onto green construction paper, then cut them out
3. Fold the tulip shape into thirds horizontally (accordion-style)
4. Once the tulip is folded, you can either punch a hole in the middle using a hole punch or cut a small horizontal slit on both folds using your scissors
5. Unfold the tulip, and insert the straw through the holes
6. Make a fold at the base of your leaves and cut a small vertical slit
7. Unfold the base of each leaf, and slide the straw through
8. Position the leaves and tulip as you wish, and you're finished!
