## PAPER PLATE BUMBLE BEE

### YOU'LL NEED:

- Paper plate
- Yellow and black craft paint
- Cotton balls
- Wooden clothespins
- Googly eyes
- Glue
- White or black pom poms

### INSTRUCTIONS:

1. Paint the paper plate yellow and allow to dry.
2. Attach a wooden clothespin to a cotton ball to form a makeshift paint brush.
3. Dip the end of the cotton ball into black paint, and paint black dots on the paper plate. Start at the bottom of the plate, and work your way about halfway up. Leave the plate yellow at the top, as this is where you will glue the bee's eyes.
4. Paint two wooden clothespins black and allow to dry.
5. Glue two black or white pom poms at the top of each clothespin (one pom pom for each clothespin). Clip the clothespins onto the top of the plate to form the bee's antennae.
6. Glue on two googly eyes, and your bumble bee is finished!
