ROLL OFF SERVICE INFORMATION

Please read****

LOCATION

The location selected for a container to be placed must be on firm and stable ground or surface, easy to get to without being obstructed by cars or debris and must be free from overhead obstructions. We ask that you do not open back door to load material. Please be aware that if the container is set on your property the customer will be responsible for any and all damages done to the property (ie grass, trees, shrubs, any utility lines/meters, sprinkler systems, asphalt/or other parking surfaces etc.)

LOADING

Containers must not be loaded above the top of the container. Any debris above the top will have to be removed to allow the container to be covered and to prevent spillage while in transit for disposal. We will only set a 20 cubic yard container for roofing and construction material unless approved prior. If you chose not to remove debris from the container there will be an additional charge of \$150.00 to come and pack or unload the container, so it can be hauled safely for disposal.

CONTENTS

Due to weight restrictions, loading heavy items such as roofing and other construction materials may be restricted to filling containers to less than half full of capacity. All loads must be evenly distributed within the container. The Solid Waste Department will not be responsible for any debris that is deposited into the container after it has been set.

It is customer's responsibility to secure box against unauthorized usage.

NOTE:

ASBESTOS AND OTHER HAZARDOUS WASTES WILL NOT BE ALLOWED VIOLATORS WILL BE PROSECUTED OR FINED
