STRAW WINDPIPE INSTRUMENT

YOU'LL NEED:

- Tape
- Scissors
- At least 8 plastic straws (any size straw will work, but jumbo straws work best)

INSTRUCTIONS:

1. Start by laying out a long piece of tape, sticky side up
2. Place the straws in a row along the length of the tape
3. Wrap the tape around the width of the straws to fasten and secure
4. Cut one end of the straws at a diagonal angle to give the straws various lengths (which will create different sounds when played)
5. Blow into the windpipe to make music
