## TIN CAN DRUM SET

### YOU'LL NEED:

- 1 can, per drum
- 1 balloon, per drum
- Scissors
- Rubber bands or electrical tape
- Safety can opener that doesn't leave sharp edges
- Chopsticks or pencils (to use as drumsticks)

### INSTRUCTIONS:

1. Remove the label from each can
2. Remove the top of each can using a safety can opener, or use cans that have tab lids (so there are no sharp or jagged edges)
3. Empty the contents, then wash and dry the can
4. Cut the end off a balloon, and stretch it over the top of the can
5. Secure the balloon with a rubber band or electrical tape
6. Your drum is now ready to play!

### TIPS:

- Using graduated sized cans means different notes can be played
- Remove both ends of the can for a more effective drum sound
- Decorate the outside of your drums with paint to personalize
- Young children should be supervised at all times for this craft
