WATER BALLOON FLIP FLOPS

YOU'LL NEED:

- 100+ water balloons
- A pair of flip flops

INSTRUCTIONS:

1. Prepare your work station. If you are using different colored balloons, separate the balloons by color (it will make the project go faster).
2. Start with one flip flop. Tie your balloons by placing each balloon under the flip flop strap. Then tie in two knots. Work your way around the entire strap.
3. Push the balloons close together as you go, making sure that the smooth part of the balloon is what will touch the foot. It is important that you put the smooth part against the foot, so it is comfortable to wear.
4. Repeat these steps on the other flip flop. Be creative, and have fun with as many colors and patterns as you like.
5. Your flip flops are now ready to wear!
