Addendum 3
RFQ 2022-049
Old McGregor Pump Station Improvements

Revision to the RFQ Section IV (4) Page 7:

Background

There is insufficient pumping capacity to meet the needs of ~~current and~~ future customers in Pressure Planes 4 and 6. The City of Waco needs an evaluation of the existing 5.0 MG ~~Low-Head~~ Pump Station conducted, and an additional 3.0 MG Ground Storage Tank (GST) constructed. The addition of a 3.0 MG GST at the Old McGregor Pump Station will accomplish the following:

1. Provide redundancy for ~~use of~~ the existing 5.0 MG GST.
2. Provide necessary capacity for customers of Pressure Planes 4 and 6.
3. Allow existing 5.0 MG GST to be rehabilitated.
4. Allow for the installation of an additional ~~low-head~~ Pump Station.

~~The Old McGregor Pump Station original plans and the plans of the later Generator Rehab Project (not as-built) can be found in Appendix D.~~

~~This is Project 9 of The City of Waco Water System Master Plan. Studies of historical and projected water demand, pressure plane maps, cost estimates, and other details can be found in The Water Master Plan which is in Appendix D~~
