Most scientific names are made by combining Greek and Latin words. Use this chart to decode the name of each Ice Age animal.

- Archaeo (very old)
- Arcto (bear)
- Baro (heavy)
- Brachio (arm)
- Cerat (horn)
- Cryo (cold)
- Dactylus, Dactyl (finger)
- Di (two)
- Dino, Deino (terrible)
- Diplo (double)
- Don, Dont (tooth)
- Dus (tooth)
- Glypto (carved)
- Gnathus (jaw)
- Homo (same)
- Lopho (crested)
- Mega, Megalo (large)
- Micro (small)
- Mimus (imitator)
- Mono (one)
- Onyx (claw)
- Ops (face)
- Ornith (bird)
- Ovi (egg)
- Pachy (thick)
- Para (next to)
- Poly (many)
- Pro (before)
- Proto (first)
- Ptero (wing)
- Saur, Saurus (lizard)
- Seismo (earth-shaking)
- Smilo (saber)
- Stego (plated)
- Super (above)
- Terra (land)
- Therium, There (beast)
- Thero (fierce)
- Tri (three)
- Veloci (swift)

While digging up fossils, you discovered a new animal! Draw a picture of your animal, and then use the chart to give it a scientific name.

★ When did your animal live? ______________________________

★ What did your animal eat? ______________________________

★ How much did it weigh? ______________________________

★ Scientific Name: ______________________________ ★
